Crypto Chaos!

FTX, the Bahamas-based cryptocurrency exchange has imploded, filing for bankruptcy. The chart above shows their FTX token, which they created, it has crashed to under \$2USD.

The news flow has been absolutely incredible. What will be the next bombshell in the crypto space?

Bitcoin continues to decline, currently trading at about \$16,000US per coin. A year ago it set all time highs of \$68,500USD per coin.

I've put together a bunch of article links on the next page, for anyone interested in the crazy FTX story. I'm sure there will be a FTX movie made. Author [Michael Lewis] has recently spent months with Sam Bankman-Fried. I can't wait to read the book when it comes out.

Is this the end for crypto?

Have a good week!

VISUALIZED: FTX'S LEAKED BALANCE SHEET

VISUALIZING FTX'S LEAKED Balance Sheet

Cryptocurrency exchange FTX has filed for bankruptcy as the exchange's finances have unraveled amidst a bank run.

Just days before filing for bankruptcy, FTX's CEO Sam Bankman-Fried attempted to raise funds, sending out a rough balance sheet (dated November 10th, 2022) of the company finances.

What was the state of FTX's finances in its final moments?

3 YEAR PERFORMANCE REVIEW

DNG NEWS RELEASES

Our featured company is a dividend-paying industrial gold ore processor headquartered in Montreal, Canada. The corporation is engaged in gold production through the processing of ore purchased from the ASM (artisanal and small-scale mining) industry. At present, Dynacor operates in Peru, where its management and processing teams have decades of experience working with ASM miners. It also owns a gold exploration property (Tumipampa) in the Apurimac department.

Q1-2022 Highlights

Operational

- Higher volume processed. 36,696 tonnes of ore (408 tpd average) compared to 29,327 tonnes in Q1-2021 (326 tpd), a 25.1% increase;
- Higher gold production. In Q1-2022, gold equivalent production amounted to 27,691 AuEq ounces compared to 21,975 AuEq ounces in Q1-2021, a 26.0% increase.

Financial

- Solid cash position. \$25.7 million;
- Earnings per share. \$5.1 million (\$0.13 or C\$0.16 per share);
- Sales. \$50.1 million.

Cash Return to Shareholders

- Share buy-back. 285,836 common shares repurchased for \$0.7 million (C\$ 0.9 million);
- Increased dividends. A 25% monthly dividend increase is paid since January 2022. On an annual basis, the 2022 dividend will represent CA\$0.10 per share or more than 3% dividend yield based on the beginning of 2022 share price.

Peru's largest ASM ore purchaser and processor

Aims to become the world's leading processor of ASM ore

15+ years of experience servicing the ASM industry

Strategic partnership with Swiss based refiner, PX Precinox | PX GROUP

*Strong balance sheet with no debt and US\$25.7 million in cash reserves (as of Q1-2022 report)

Non-dilutive business model with only 38.6 million shares outstanding (last equity financing in 2010)

LIT

CORPORATE SPONSOR

ARGENTINA LITHIUM & ENERGY

Argentina Lithium & Energy believes that the combination of high geologic potential and a promising demand climate have set the conditions for delineating and advancing new lithium resources in Argentina. The Company's management group has a long history of success in the resource sector of Argentina and a strong track record of government and community relations.

Four under-explored projects in the heart of the Lithium Triangle in Argentina.

Brine mapping and drilling planned for 2022.

- ~57,000 hectares of claims on four salars in the Lithium Triangle.
- Projects strategically located in pro-mining provinces Salta and Catamarca, near key infrastructure with year-round access.
- Aggressive new exploration programs in 2022 and continued evaluation of new prospects.

Projects

Rincon West

- 2,491 ha under option; 460.5 ha 100%-held
- Adjacent to Rincon Ltd. and Argosy Minerals lithium projects with proven reserves
- Excellent infrastructure including international highway, electric power corridor
- First drill program, 5 holes, underway
- 1st hole results positive: intersected a 70m permeable interval with 225 to 380mg/L Lithium

Pocitos

- +26,000 hectares under option
- Excellent infrastructure: International railway to Pacific ports crosses the property; Provincial highway and major gas pipeline nearby
- Limited historic exploration

Antofalla North

- 9,080 hectares of 100% held claims + nearly 6,000 hectares under option
- Major lithium producer Albemarle has large holdings starting 500m to the south
- Geophysical survey identified high-conductivity targets in upper 100 metres, additional targets at depth

Incahuasi

- 100% interest in over 25,000 hectares
- Located north of Lake Resources' Kachi Project
- Maximum values 409 mg/L lithium and 1.56% potassium recovered in near-surface sampling (to 8m depth)
- 4 drill-holes confirmed lithium-bearing brines (average to date 109 mg/L Li, 6718 mg/L K)

Exploring the Prolific Lithium Triangle

- Lithium Triangle produces ~1/2 of the world's lithium
- Hosts ~60% of known lithium reserves
- Most lithium is in salt lake ("salar") brines
- Argentina produces ~10% of the world's lithium and is a top-5 global producer (2020)
- In close proximity to rail, water, roads and power
- Argentine government is encouraging foreign investment and renewable energy initiatives

Value and Growth for Investors

PROVEN MANAGEMENT

- Success in discovery, monetizing of assets & capital markets

STRONG FINANCIAL POSITION

- Treasury funded for active exploration
- Substantial equity interest in SSR Mining; leveraged to gold & silver

BUILDING VALUE IN A PROJECT PIPELINE

- New San Pietro 100% held Cu-Au (Co) advanced exploration project adjacent to producing & emerging mines in Chile
- Advanced targets with short-term resource potential plus property-wide upside
- Actively exploring multiple precious metal projects with discovery potential
- +200,000 ha of prospective properties available for JV

Golden Arrow Resources Corporation is a mining exploration company creating value by making precious and base metal discoveries and advancing them into exceptional deposits. Golden Arrow is a member of the Grosso Group, a management company with a track record of discovery in South America.

San Pietro Copper-Gold-Copper Project, Chile

FULL OWNERSHIP:

100% of 18,448 hectares

STRATEGIC LOCATION:

Between Capstone Copper's Santo Domingo and Mantoverde IOCG mine projects

EXCELLENT INFRASTRUCTURE:

100 km N of Copiapo in mining centre; roads and power lines at property

STRONG OUTLOOK:

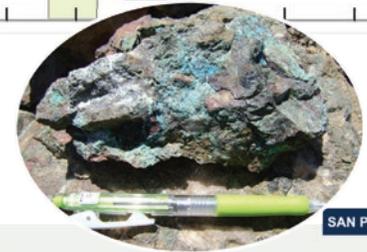

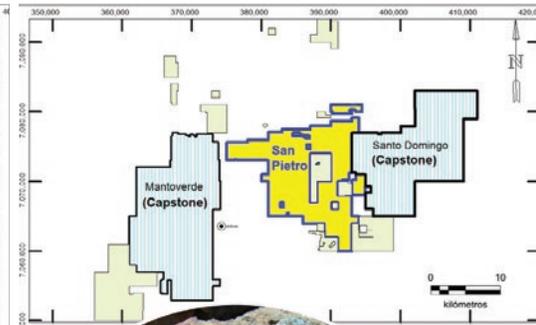

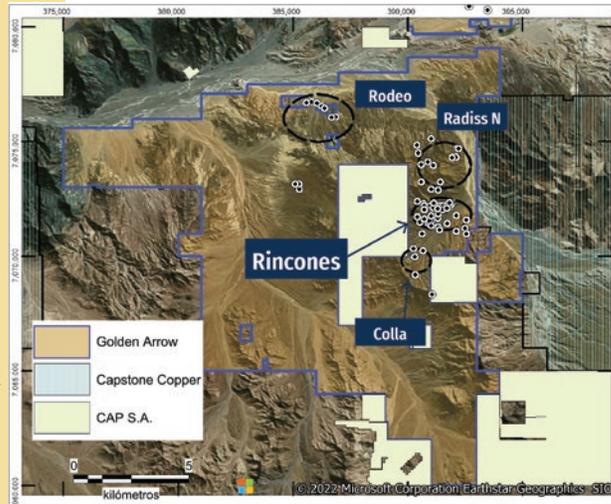

Copper, Gold, Iron and Cobalt all on positive long-term trends

ADVANCED STAGE:

+30,000m of drilling, 4 defined targets, exploration upside

2022 PLAN:

Evaluate full property and refine existing targets for major 2023 drill program

“WE ACCOMPLISHED THIS ACQUISITION BY TAKING ADVANTAGE OF THE STRONG FINANCIAL POSITION THAT RESULTED FROM OUR LAST SUCCESSFUL TRANSACTION... NOW OUR TECHNICAL TEAM WILL TRY TO DO AS THEY DID WITH OUR CHINCHILLAS PROJECT IN ARGENTINA AND ADVANCE A STRATEGICALLY LOCATED EXPLORATION PROJECT TO PRE-FEASIBILITY.”

- Joseph Grosso, Golden Arrow Executive Chairman, President and CEO.

FTX MASSIVE CRYPTO FRAUD JUST GOT WORSE

BY: STEVE BURNS

NEWTRADERU.COM

NOVEMBER 13TH, 2022

At least \$1 billion of client funds are missing at failed crypto brokerage firm FTX, some sources say it could be as much as \$2 billion but the exact numbers are not known yet as the investigation and bankruptcy proceeds.

There were many bad signs and people questioning the FTX business model and even questioning whether it was a big Ponzi scheme before it unraveled. The first trouble began when they had \$5 billion in withdrawals on Sunday, their largest withdrawal day ever.

The FTX problem became more apparent as what was perceived as a potential liquidity crunch quickly evolved into a crisis. They were thought to have the assets to back their liabilities in their crypto wallets but it devolved into the assets not being worth what they thought they were. There also was not enough buyers to sell their crypto holdings to as many of them were altcoins with a small market for potential buyers.

Binance sold their holdings in the FTX native FTT token leading to its price collapse and pushing FTX into insolvency with that hit to their balance sheet. Binance initially proposed a bailout and acquisition but after doing their due diligence with a nonbinding deal they turned down the deal and left FTX in a position to be forced into bankruptcy. [1]

“In the beginning, our hope was to be able to support FTX’s customers to provide liquidity, but the issues are beyond our control or ability to help,” Binance said in a statement. Zhao tweeted that it was a “sad day”. [2]

The Binance research and rejection of the deal destroyed the FTX credibility leading to FTX having to stop withdrawals after a run on the broker by customers to get their cryptocurrencies and assets out. The demand for the money in accounts led to FTX becoming insolvent and exposing the potential that it was a fraud.

FTX founder Sam Bankman-Fried’s assets plunged from \$16 Billion to zero in days. He resigned as FTX’s CEO as it files for bankruptcy. SBF’s net worth went from \$26 billion at his peak in March to \$0 after the implosion of FTX. [3]

The current Sam Bankman-Fried net worth is \$0.

Why has FTX collapsed?

FTX trading’s liabilities dwarfed liquid assets. FTX held \$900 million in liquid assets against \$9 billion of liabilities the day before Friday’s bankruptcy filing, the Financial Times reported Saturday, citing investment materials the newspaper had seen. [4]

FTX Chief Executive Sam Bankman-Fried said in investor meetings last week that Alameda owes FTX about \$10 billion, people familiar with the matter said. FTX extended loans to Alameda using money that customers had deposited on the exchange for trading purposes, a decision that Mr. Bankman-

Image created by Holly Burns

Fried described as a poor judgment call. FTX had \$16 billion in customer assets, sources said, so FTX lent more than half of its customer funds to its sister company Alameda. [5]

Mixing client money with a company’s portfolio and trading account is both theft and fraud. Client capital is suppose to be held in their own account and away from company funds.

When they needed the capital for client withdrawal requests they did not have it, forcing them to suspend withdrawals. They later started allowing withdrawals again but then stopped. Now as FTX files for bankruptcy the funds are locked as it goes to court to see what can be salvaged and returned to investors.

Other past endeavors by Bankman-Fried that may have led to this crisis included loans to or moves to acquire faltering crypto lender BlockFi, lender Voyager Digital and the Skybridge Capital hedge fund. Also its trading arm Alameda Research also led a funding round for the Aptos blockchain as investment funds were declining. [6]

It turns out SBF was not the modern day crypto version of J.P. Morgan bailing out other crypto brokers but making FTX even more weak from a capital and liquidity standpoint through helping other firms.

FTX legal and finance teams also learned that SBF implemented what two people described as a “backdoor” in FTX’s bookkeeping system, which was built using bespoke software. CNN sources said the “backdoor” allowed SBF to execute commands that could alter the company’s financial records without alerting other people, including external auditors. This set-up meant that the movement of the \$10 billion in funds to Alameda did not trigger internal compliance or accounting red flags at FTX. [7]

To prop up his other company Alameda, which held almost \$15 billion in assets, SBF also transferred billions in FTX

funds, backed by assets that included FTT and stock shares in Robinhood. [8]

The majority of its loans and buying power were backed by their own FTT token that they issue their self. This was their primary asset on the balance sheet. This was a huge undiversified risk.

The collapse of FTX was triggered by many factors:

- **The massive \$5 billion in withdrawal fund requests by customers, Sunday.**
- **Its relationship with Alameda and the losses they accrued after mixing client funds that destroyed their liquidity for withdrawals.**
- **Binance selling their FTT token holdings setting off its crash.**
- **The loss of confidence in FTX after Binance declined to acquire it after due diligence.**
- **The FTT token was the primary asset on its balance sheet and it crashed from \$26 to under \$2.**
- **It appears now that FTX was just a Ponzi Scheme but all the details have not come out yet.**

Finally after all this situation unfolded over \$600 million was siphoned from FTX's crypto wallets late Friday. FTX stated in its Telegram channel that it had been compromised, telling users not to install any new upgrades and to delete all FTX apps.

"FTX has been hacked. FTX apps are malware. Delete them. Chat is open. Don't go on FTX site as it might download Trojans," wrote an account administrator in the FTX Support Telegram chat. The message was pinned by FTX General Counsel Ryne Miller.[9]

FTX also spent a huge amount of money with advertising, paying YouTube influencers, big celebrities for paid endorsements like Tom Brady, Larry David, and Kevin O'Leary and even buying the naming rights to the Miami Heat's arena. They had a tremendous cash burn rate with that level of spending.

This story is still not over and will make a great movie one day. It's terrible how many customers lost money to a broker they trusted.

How much did FTX pay Miami?

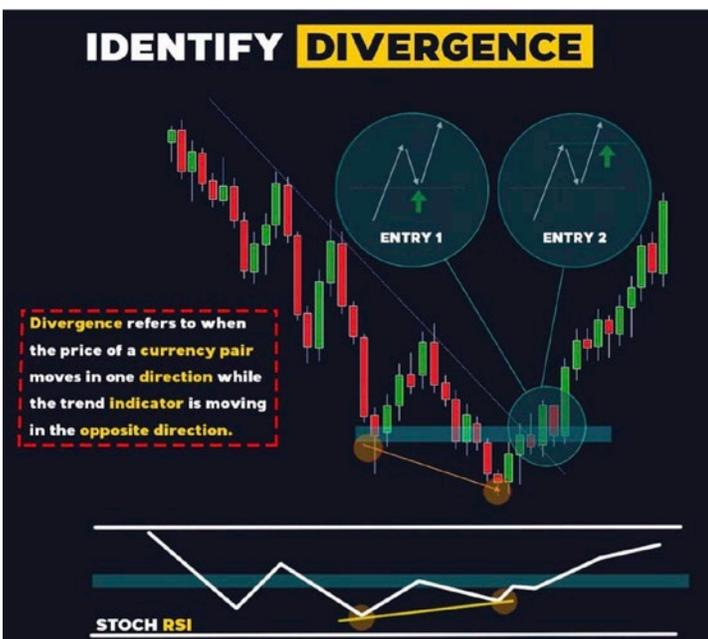

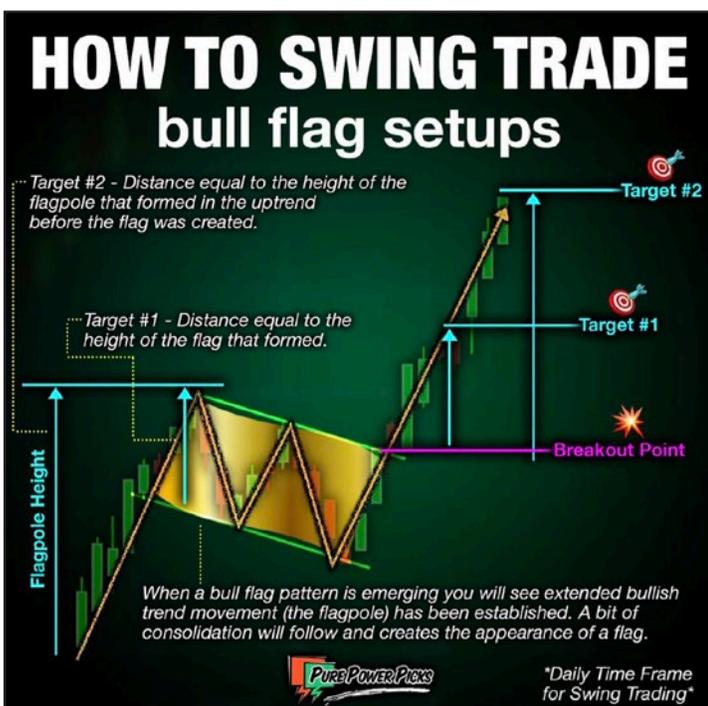

FTX signed a \$135 million, 19-year deal to rename the Miami arena in June 2021. FTX owes Miami \$16.5 million for the arena sponsorship cancellation. [10] [11]

Why can't I withdraw money from FTX?

All FTX accounts have been frozen for withdrawals as they have officially filed for Chapter 11 bankruptcy. The company will need to be investigated and audited for assets versus liabilities. A judge will later decide how to best divide up the remaining FTX assets between investors, debt holders, vendors, contract holders, account holders, and debt collectors.

FURY

EDITOR'S
WATCHLIST

Durango
RESOURCES INC.

Fury Gold Mines (FURY TSX) closed at .46 on Friday. This morning they put out drill results from their Eau Claire project in Quebec. [[Full Release with illustrations here](#)]

Fury Drills 45 g/t Gold Over 1 Metre in the Gap Zone at Eau Claire

VANCOUVER, BC / November 21, 2022 / Fury Gold Mines Limited (TSX:FURY)(NYSE American:FURY) ("Fury" or the "Company") is pleased to provide results for three core drill holes at the Eau Claire project located in the Eeyou Istchee Territory in the James Bay region of Quebec. The three holes targeted the Gap Zone between the 450 Zone, which hosts the bulk of the Eau Claire defined resource (Figure 1), and the Hinge Target. Drill hole 22EC-058 intercepted three zones of gold mineralization across 42.5 metres (m) drilled width including 1.0m of 45.00 g/t Au and 1.0m of 5.55 g/t Au (Table 1). The intercepts from 22EC-058 extend gold mineralization by approximately 150m to the west and 315m down dip of the defined resource, further expanding the mineralized footprint of the deposit.

"The Gap Zone is a highly prospective target for Fury and these results are very encouraging as they have expanded the mineralized footprint at Eau Claire and demonstrate that the deposit is open for significant expansion in a third target area," commented Tim Clark, CEO of Fury. "We are looking forward to the remaining 11 drill holes completed, from the Hinge Target, Eastern Extension, and Percival targets which are pending assay, with results expected in the coming weeks as well as the expansive Geochem survey we completed at our Lac Clarkie project."

Gap Zone

Fury's recognition of the stratigraphic controls on the Eau Claire deposit mineralization opened up the "Gap Zone" for targeting. Drill holes 22EC-056 - 22EC-058 targeted a 450m by 450m area that was not historically drilled. Drill hole 22EC-058 demonstrates the potential of this area to add additional ounces to the resource as it represents a 150m step out and 315m down dip extension from the limits of the currently defined resource. Fury believes that additional drilling is warranted in the Gap Zone area due to its location directly west of the 450 Zone, and its relatively shallow position within the system. The stratigraphic position of the mineralization encountered in drill hole 22EC-058 is consistent with that encountered in the deep portions of the Hinge Target starting 400 metres to the west.

"Between the newly encountered mineralization at the Gap Zone and the Hinge Target we have significantly expanded the mineralized footprint of the Eau Claire deposit. The deposit remains open in all directions, and we look forward to continuing to showcase the potential scale of Eau Claire," stated Bryan Atkinson, SVP, Exploration of Fury.

Currently, there is one completed hole pending assay results from the Hinge Target, two from the eastern extension and eight from Percival. The Company anticipates results from these holes to be released as received over the coming weeks

Durango Resources (DGO TSX-V) closed at .055 on Friday. On November 8th they put out a news release about new ground staked and that there was a fire at the lab which is processing their drill core???. 4.9 Million shares traded that day. The newly staked Durango properties I found on the BC claims map were (in my estimate) 8-10 km away from the recent American Eagle drill hole. [[Full News Release](#)]

"Durango Resources Inc. (TSX.V-DGO) (Frankfurt-86A1) (OTCQB -ATOXF), (the "Company" or "Durango") announces that it has staked property near the recent NAK copper discovery located in the Babine copper-gold porphyry district of west-central British Columbia. On November 7, 2022, American Eagle Gold Corp. (TSXV-AE) announced a 125-meter discovery from surface of 1.02% copper equivalent on its NAK property maiden drill hole. It is reported that the NAK is a near or at surface classic porphyry copper-gold system with road access. Marcy Kiesman of Durango stated, "American Eagle detailed in their press release that they 'have encountered mineralization in every hole' and that 'the bounds of the system are entirely unknown' which is very encouraging. Historical copper occurrences in the immediate area were available for staking resulting in Durango acquiring two separate copper occurrences totaling over 1,000 hectares." The Company will begin reviewing the historical reports in conjunction with the reported geology from American Eagle Gold Corp. to determine the next steps for the new Durango property. Durango is still waiting for assay results on its summer drill program at Discovery, Québec which were initially delayed due to a fire at the core processing facility and are still under the secondary delay due to the assay lab backlog. Results will be reported as soon as they are available."

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Glossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policy making body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
