Gold continues its climb.

Will the continued negative crypto news drive crypto investors into gold? This weekly recap by Wahid Pressarlay lays out the \$4 Billion DoJ fine on Binance and their CEO exiting, the SEC suing Kraken, and an \$85 Million hack. [[News article](#)]

The FOMC will meet on Wednesday December 13th and hopefully give us some more certainty on the direction of interest rates. Jerome Powell is still concerned about inflation so an increase in rates is probably still on the table, but then there is the recession side of the coin.

[[US recession will prompt 175 basis points in Fed cuts next year, DB economists say](#)]

Gold is already up \$30USD+/oz today and I think we will see new all time highs soon!
Have a great week!

- 3,282 ha under option & 460.5 ha 100%-held
- Adjacent to Rio Tinto Ltd. and Argosy Minerals lithium development projects, with proven reserves*
- Excellent infrastructure including international highway, electric power corridor
- 1st drill program completed; results include: 287 to 402 mg/L Li in 258m interval (RW-DDH-009) (2 intervals not sampled, 42m & 33m) and 329 to 393mg/L Li in 153m interval (RW-DDH-006) and 334 to 382 mg/L Li in 132m interval (RW-DDH-004) and 337 to 367 mg/L Li in 123m interval (RW-DDH-002) (40m not sampled)
- 2nd drill program underway + permitting for pump tests

Pocitos

- +26,000 hectares under option
- Excellent infrastructure: International railway to Pacific ports crosses the property; Provincial highway and major gas pipeline nearby
- Limited historic exploration

Antofalla North

- 10,050 hectares of claims, 100% held & under option
- Major lithium producer Albemarle has large holdings starting 500m to the south
- Geophysical survey identified high-conductivity targets in upper 100 metres, additional targets at depth
- 110 line-km TEM survey planned to delineate brine targets, with drilling planned to follow in early 2024

Incahuasi

- 100% interest in over 25,000 hectares
- Located north of Lake Resources' Kachi Project
- Maximum values 409 mg/L lithium and 1.56% potassium recovered in near-surface sampling (to 8m depth)
- 4 drill-holes confirmed lithium-bearing brines (average to date 109 mg/L Li, 6718 mg/L K)

Key Project Highlights

- +64,000 hectares of claims on four salars in the Lithium Triangle.
- Projects strategically located in pro-mining provinces Salta and Catamarca, near key infrastructure with year-round access.
- Aggressive exploration programs in 2023 including advancing toward first resource estimate at Rincon W.
- Recently completed first drill program at Rincon W returning moderate to high grades of lithium over long intervals, including:
 - 287 to 402 mg/L Li over 258m starting at 83m depth

TRACK THE TRADING EFFICIENCY STATISTIC TO SEE AREAS OF IMPROVEMENT FOR INCREASED PROFITS

BY: CORY MITCHELL
NOVEMBER 17, 2023

TRADETHATSWING.COM

The efficiency trading statistic tracks how well we follow our [Trading Plan](#) rules. It lets us know how well we are trading relative to a more objective measure than simply how we “feel” we’re trading.

I first learned Efficiency from the late Van Tharp.

In its simplest form, say I make 10% on a trade because I exited early for no good reason other than I’m afraid to lose, for example. I didn’t follow my exit rules. The rule-based outcome produced a 20% profit.

That is 50% efficiency. I got 50% of what I was supposed to, as an example.

If I got out for a 15% gain and the strategy produced 23%, that is 65% efficiency (15/23).

If you don’t have a strategy or Trading Plan, EVERY TRADE IS A MISTAKE.

An efficiency score tells us basically how much our emotions are impacting our results. Rationalizations can creep in and we may say “I was tired” or “[Conditions changed](#)”. If that is the case, you need rules for those types of situations.

I actually have rules for if I’m feeling emotional, uncertain, or if conditions change. If you are constantly rationalizing that means you’re inefficient in following your system OR you have too many holes in your Trading Plan. Something is wrong, period.

If we track common “inefficiencies”/mistakes and the emotions involved, we can then work on those areas to improve. It creates a line in the sand where we can’t manipulate ourselves. The number shows us where we stand versus our system...and we then have some tangible data for closing the gap.

Efficiency numbers fluctuate but over many trades you can see where you are at and incrementally improve it by sticking to the rules. You improve efficiency and results not by trying to “win” but by following your rules.

Improve efficiency. It’s critical for trading success.

I have provided some further insights on Efficiency below, but they are just insights. There is no perfect way to use it or calculate it. It is a tool. Decide how you want to use it so that it helps you and allows you to track your progress.

Interested in day trading stocks?

Learn how and when to capitalize on price patterns that occur multiple times per day in stocks. Learn precise patterns to watch for that present a favorable risk/reward opportunity in the [Price Action Stock Day Trading Course](#).

Calculating the Trading Efficiency Statistic

I have included Efficiency in both the [day trading log](#) and [swing trading log](#) which you can download.

Calculating the static can be very straightforward in some situations, but may need to be “estimated” in other situations.

For example, if the rules provided 5R during your day trading session, but you only got 3R, that is 60% efficiency.

But what if you held a trade longer than you were supposed to and actually made 6R instead of 5R?

Well, some people would give themselves a pat on the back, but it is not a good habit to violate your rules, even if you win. If you want to hold some trades for bigger profit...MAKE RULES for that situation or condition.

So I would give an efficiency score of 80%. Basically, you make 1R in mistakes. The actual is 5R, so a 1R mistake is 20% of that. It was a 20% mistake, 80% efficient.

If you track percentages or dollars instead, it works the same.

Say you should have had 14% in gains or \$2100 in profit. If you only make 11%, the efficiency score is 76%. If you make \$2300 instead of \$2100, something was maybe a little off, so your efficiency is 90% (\$200 in mistakes / \$2100 is a 10% mistake so you were 90% efficient).

What is a Good Trading Efficiency Score?

There will always be tiny inefficiencies in trading. Anything near 80% or above is great.

Tiny efficiencies happen because:

- Position size may be slightly off, we may not even be able to get an exact position that matches exactly the risk we are willing to take on.
- [Slippage](#) happens on trades, which will affect profits and losses. If we lose more than expected on a trade (or make less) that affects efficiency. You may have followed the rules, but it is still important to see how slippage affects your results.

- We get distracted and miss trades or get impulsive. Again, it's good to know how much that affects results.

So perfection isn't the goal. We just want to be improving so that our results closely match the system we are trading.

If the system sucks, that's a different issue. Create strategies you do like.

Want to learn how to swing trade stocks? Catching explosive moves that often run 20% or more within days and weeks of entry? Check out the [Complete Method Stock Swing Trading Course](#).

How to Improve Trading Efficiency

Generally, poor Efficiency is due to [trading mistakes](#). We took trades we weren't supposed to, exited early, held onto a loss past our stop loss point, or didn't take a trade we were supposed to, as some examples.

Improving efficiency means we need to reduce the number of mistakes made. It can seem overwhelming, so just focus on one mistake at a time. Isolate it down to one thing which causes most of the issues. Then just try to improve it incrementally.

If you had 10 impulsive trades last month don't assume you will be able to get rid of them all instantly. If you have fewer impulsive trades next month that's an improvement. Once you have minimized that mistake, move on to another one. This way you actually make progress; if you try to solve everything at once you will get nowhere.

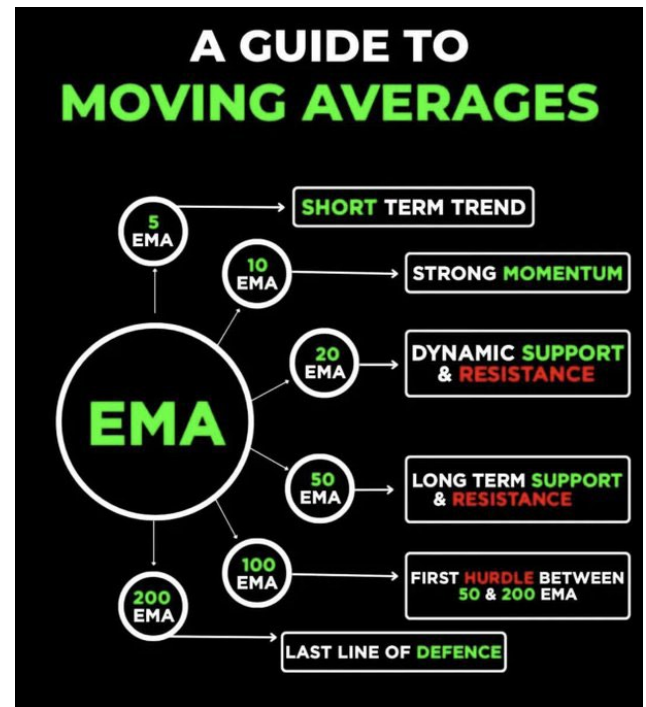

Here are some articles on how to reduce mistakes. Remember, these are mental mistakes. The strategy produced a certain result and you didn't, so it's not the strategy's fault. That is why all these mistake-reduction exercises are mental:

- Bring [focus to How and Why](#) you will do something instead of only thinking about results.
- [Eliminate \(via reduction over time\) Impulsive Trades](#) by having a pre-trade routine and Commentating the price action.
- Isolate the part(s) of yourself that sabotages you. Find out why and do a [Parts Negotiation](#) with it.
- Stop relying on willpower and discipline which can fail at critical moments. Instead, work on developing your identity, who you are and want to be, with [Identify Work](#).

If poor efficiency was due to slippage, but you followed your rules, note that it happened and maybe there is a way to avoid such big slippage in the future. Or maybe you decide it was an isolated incident, your risk is controlled, so you don't think much about it. If you are following your rules, efficiency will improve again.

Metals/Crypto Prices

CEO.CA	Price	1 Week	YTD
Gold	\$1,991.90	1.47%	8.73%
Silver	\$23.69	0.79%	-2.55%
Copper	\$3.77	1.43%	-1.13%
CAD/USD	\$0.73	-0.08%	-1.04%
Bitcoin	\$37,610.32	0.17%	127.34%
Ethereum	\$2,078.56	1.52%	74.08%

*Metal and cryptocurrency data as of 4:00pm ET yesterday.

In Today's Briefing

Gold remains buoyant in brisk trade, riding both sides of the \$2k line, even as fund managers appear to be paring their speculative (long) positions confident the 'fear trade' is about done - [Gold's fear trade has officially peaked as hedge funds ditch their bullish bets.](#)

The CFTC's disaggregated Commitments of Traders report for the week ending Nov. 14 showed money managers dropped their speculative gross long positions in Comex gold futures by 7,685 contracts to 132,924. At the same time, short positions rose by 6,235 contracts to 68,609.

We're currently testing recent highs on the daily chart and one can't help but think one of these tests will usher in a breakout to record highground. In light of all the economic and geopolitical uncertainty lurking beneath the surface, those bullish on the metal's long-term prospects believe a meaningful (historic) breakout to new highs is imminent, some proclaiming, "If not now...When?"

Kitco's Gary Wagner says this recent strength in the metal is the result of multiple factors: "First, the release of economic reports indicates that the economy in the United States has been contracting as a result of recent rate hikes by the Federal Reserve. Secondly, the Federal Reserve released its minutes from the last FOMC meeting in which the Fed continued to maintain its current interest rate level."

[- Fed hikes may have concluded, as central banks purchase gold at a record level.](#)

Wagner also cited easing monetary policies by central banks around the globe (cept for the Fed) and intensified central bank buying as causes for this recent buoyancy.

The World Gold Council has updated its list of gold reserves by countries revealing that many central banks aggressively added to their gold reserves. Collectively these purchases by global central banks are at a record pace for the first three quarters of 2023 which totals 800 tons, with China Poland, and Singapore being the primary buyers. This pace is well above the total purchases for the same period in 2022.

A few select stories that crossed our screens

Ivanhoe Mines Delivers High-Grade Cu in the DRC

Robert Friedland's Ivanhoe Mines (IVN.TO) recently tabled maiden mineral resource estimates for its high-grade Makoko and Kiala deposits, both contained within the 'uniquely endowed geological terrain' of its [Western Foreland](#) exploration project in the Democratic Republic of Congo (DRC) - [Ivanhoe Mines Reports Mineral Resources for Makoko and Kiala Discoveries in the Western Foreland.](#)

- Makoko contains an Indicated mineral resource of 16 million tonnes at 3.55% Cu plus Inferred resource of 154 million tonnes at 1.97% Cu using a 1.5% Cu cut-off.
- Kiala contains an Indicated mineral resource of 5 million tonnes at 3.56% copper using the same cut-off.

According to the company, Makoko ranks as the world's third-largest and highest-grade copper discovery since tagging [Kakula](#) on an adjacent (400-square-kilometre) property back in 2016.

“Makoko and Kiala are two distinct discoveries adjacent to the Kamo-a-Kakula copper complex and continue Ivanhoe’s distinguished track record of making greenfield discoveries in this uniquely endowed geological terrain,” the company said in a statement.

The company will now examine the heap leaching viability of the near-surface resources at Makoko, which, if possible, “would be both a very low capital intensive, as well as a very low carbon intensive way of producing copper cathode.”

All told, Ivanhoe has blocked out 38.7 million tonnes of contained copper in the M&I resource categories, plus an additional 9.4 million tonnes of Inferred material in the subsurface layers underpinning the Western Foreland shelf, a structure that includes [Kamo-a and Kakula](#).

Robert Friedland: “The theory was proven to be correct, as our team of visionary geoscientists discovered Kamo-a in 2008, followed by the monumental Kakula discovery in 2016. In little over five years, Kakula went from drill core samples to one of the five largest copper mines in the world, with by far the highest grade, thanks to the hard work of our outstanding project and operations teams.” These high-grade resources were well received by the market, along with Friedland’s comment that “there is much more to come as this story unfolds ... we continue to perfect our knowledge of the geological controls of this globally significant copper district ... and we are adding to our carefully chosen land position in the region.”

Hollywood Gives First Quantum What For

First Quantum can't seem to catch a break as opposition to its colossal [Cobre Panama copper mine](#) in Panama continues to intensify.

Capable of producing > 300,000 tonnes of copper per annum (1.5% of global copper supply) once it's in gear, there's a lot riding on this one. But as things currently stand, the company is contemplating a complete shutdown later this week if a port blockade continues to prevent the flow of critical supplies - [First Quantum to Halt Panama Mine This Week If Blockade Persists](#).

The Canadian company started slowing operations last week after what it called an illegal blockade of small boats at its port hit the delivery of supplies to the mine. It has since further reduced production and expects to put the site in care and maintenance mode from Nov. 23 if the situation doesn't change, according to a person familiar with the matter, who asked not to be identified discussing private information.

Now Hollywood is weighing in - [Leonardo DiCaprio backs Panamanians' protests against First Quantum's operation](#).

The company estimates that the two-month suspension earlier this year caused up to \$8 million in losses per day. The country's Chamber of Commerce estimates that the protests cost the nation between sixty and ninety million US dollars daily.

With the government coffers stoked to the tune of \$375 million per annum under their current contract with the Canadian miner, there's a lot riding on this one indeed.

But amidst all this uncertainty (and Hollywood drama), at least one large investor views the current equity beatdown as an opportunity - [China's Jiangxi Copper boosts First Quantum stake after stock rout](#).

With general elections coming up in May, Cobre Panamá will be the subject of heated debate (understatement)—many a political career will rise or fall over this issue—there can be no middle ground.

In the auction arena, heaps of What For...

Abitibi Metals Lights Up Trading Screens

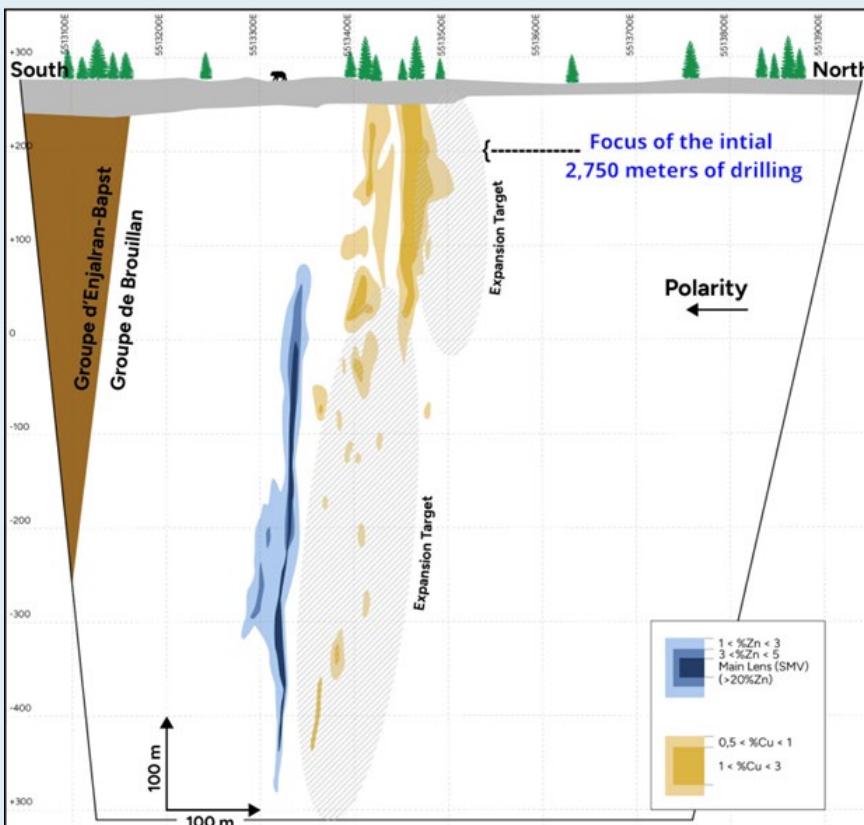

Abitibi Metals (AMQ.C) trotted out an acquisition last week that generated a high-volume trading frenzy in the company's underlying common shares - [Abitibi Metals Secures the High-Grade B26 Polymetallic Copper Deposit \(Ind: 7.0MT @ 2.94% Cu Eq & Inf: 4.4MT @ 2.97% Cu Eq\)](#).

It would appear that SOQUEM, a subsidiary of Investissement Québec, has a few high-quality gems available for JV in its project portfolio. But only to the right partner. The [B26 Polymetallic Copper Project](#), the acquisition that triggered the high-volume trajectory highlighted in the above chart, is a property company management has had its eye on for the past three years. Located along the prolific Abitibi Greenstone belt and characterized as “one of Quebec’s most promising mineral discoveries (with a current strike of 1 km and depth extent of 0.8 km),” the project boasts a high-grade resource of some 400 million pounds of copper and 286,000 ounces of gold (along with significant zinc and silver credits at depth).

B26 Resource Summary (2018):

- Indicated: 6.97 Mt at 2.94% Cu Eq (1.32% Cu, 1.80% Zn, 0.60 g/t Au and 43 g/t Ag);
- Inferred: 4.41 Mt at 2.97% Cu Eq (2.03% Cu, 0.22% Zn, 1.07 g/t Au and 9 g/t Ag).

Located along the same structural trend as the historical Selbaie Mine 7 kilometers to the southwest (Selbaie's historical resource = 56.9 Mt @ 0.87% Cu, 1.85% Zn, 0.55 g/t Au, 39 g/t Ag), the company is targeting the “low hanging fruit”—the expansion potential of its existing high-grade (shallow) resource with an initial drill program consisting of roughly 2,750 meters.

Jonathon Deluce, CEO and significant shareholder: “One of the key characteristics for us was to find an asset with the potential to deliver an economic PEA with a minimum defined 20-to-30-million-ton high-grade copper resource, and I firmly believe that we have achieved that with B26. We have an aggressive exploration plan designed for this deposit with 12,500 metres targeted in 2023-2024 with an initial 2,750 metre program to commence shortly. Our initial drill strategy aims to delineate B26's open-pit potential in addition to continuing to develop and grow the existing underground resource. We believe there is significant upside in developing an open-pit resource and look forward to including this as part of a robust maiden Preliminary Economic Assessment with strong numbers.”

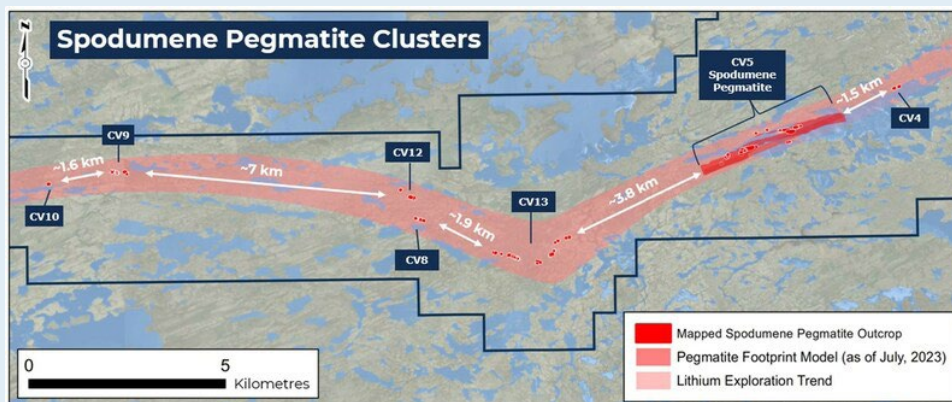

Getting this deal inked with SOQUEM, now a significant AMQ shareholder, demonstrates a high level of confidence in their new partner. On the ropes and in desperate need of a confidence boost, the junior sector would benefit from more deals like this one.

New Li Discovery in James Bay Stokes Hopes for Resumption of Regional Bull Market

The James Bay district of Quebec has all the makings for a classic area play. The region's Li discovery cycle is in its infancy, but exploration newsflow has been dead slow. Last summer's region-wide forest fire shutdown didn't help. And now, with exploration activity ramped back up, the labs are inundated with samples, and assay results have slowed to a trickle.

But investors may again develop an appetite for the region, courtesy of the business end of the drill bit - [Patriot Makes New Discovery at the Corvette Property as it Intercepts 100 m of Spodumene-Bearing Pegmatite at CV9, Quebec, Canada.](#)

Patriot's meteoric price chart trajectory was based in no small part on the regional potential for significant new hard rock Li discoveries at its mothership [Corvette Property](#) located in the Eeyou Istchee region of James Bay, Quebec. This Nov. 22 press release stands to validate this discovery potential. This new discovery—the CV9 Spodumene Pegmatite—is located roughly 14 kilometers west of the CV5 mineral resource that currently stands at 109.2 Mt at 1.42% Li₂O Inferred (CV5 ranks as the largest lithium pegmatite resource in the Americas and one of the top 10 largest lithium pegmatite resources in the world).

The Nov. 22 press release highlights:

- Drill hole CV23-345 hits approximately 100 m of near-continuous spodumene-bearing pegmatite at CV9;
- Three (3) drill holes have returned continuous pegmatite intersections of 60+ m;
- Patriot has defined a pegmatite strike length of approximately 450 m by drilling and outcrop at CV9, which remains open;
- CV9 is located approximately 14 km west of the CV5 mineral resource;
- Preliminary geological modelling indicates the CV9 Pegmatite significantly thickens to at least 80 m width at one location and remains open in multiple directions;
- The magnitude of this variably mineralized pegmatite blow-out is significant, sharing similarities to those present at the CV5 Pegmatite in terms of depth and scale;

- Eighteen (18) core holes (~4,000 m) have been completed in the inaugural drill program at the CV9 Pegmatite.

The company states that, to date, seven distinct clusters of lithium pegmatite have been discovered across the Corvette Property—CV4, CV5, CV8, CV9, CV10, CV12, and CV13. “Given the proximity of some pegmatite outcrops to each other, as well as the shallow till cover in the area, it is probable that some of the outcrops may reflect a discontinuous surface exposure of a single, larger pegmatite “outcrop” subsurface.”

Assays for the new CV9 discovery are pending.

Hits Of The Week

[Early Saturday morning](#), Elon Musk posted that his social media platform X will be “filing a thermonuclear lawsuit” against left-leaning non-profit Media Matters and “all those who colluded” for “completely misrepresenting” the real user experience on X - [“Don’t Be Manipulated, Stand With X” - As Elon Promised, X Files Suit Against Media Matters](#)

THE TOP 10 BEST FINANCE AND BUSINESS MOVIES

BY: STEVE BURNS
OCTOBER 22, 2023

NEWTRADERU.COM

When it comes to the best finance and business movies, Hollywood has a lot to offer. They have given us some unforgettable films that entertain and educate. Whether you're a seasoned trader, an aspiring entrepreneur, or just someone interested in finance, these movies offer valuable insights. These films provide valuable insights into the complex world of finance, trading, and entrepreneurship. In this article, we'll delve into the top films that have significantly impacted how their audiences understand business and finance, from the ethical dilemmas of Wall Street to the innovative strategies that can disrupt traditional industries.

Here's a rundown of the top 10 best finance and business movies and why they deserve a spot on your watchlist.

1. **Wall Street** (1987) – A classic that delves into the greed and ethics of Wall Street.
2. **The Big Short** (2015) – Explains the 2008 financial crisis engagingly.
3. **Boiler Room** (2000) – Another look at the darker side of unethical brokers and high pressure sales to push pump-and-dump schemes.
4. **Margin Call** (2011) – A thriller over 24 hours at an investment bank during the financial crises of 2008.
5. **Moneyball** (2011) – Shows how analytics can change the game, literally and figuratively.
6. **Wolf of Wall Street** (2013) – A wild ride through a brokerage pump-and-dump scheme, along with corruption, and excess.
7. **Inside Job** (2010) – A documentary critically examines the 2008 financial crisis.
8. **Trading Places** (1983) – A social experiment orchestrated by two wealthy commodity brokers who make a bet to settle the nature vs. nurture debate on success.
9. **Enron: The Smartest Guys in the Room** (2005) – A documentary about one of the biggest corporate scandals in history.
10. **Glengarry Glen Ross** (1992) – Focuses on the competitive world of real estate sales.

Wall Street

Oliver Stone's "Wall Street" is a classic that delves deep into the greed and ethical dilemmas that plague the financial industry. Released in 1987, the film's protagonist, Gordon Gekko, became an icon of unrestrained greed. The movie serves as a cautionary tale about the dangers of unchecked ambition and offers a glimpse into the high-stakes world of Wall Street trading.

The Big Short

"The Big Short" is a compelling drama that explains the 2008 financial crisis engagingly and understandably. Based on Michael Lewis's book, the film employs humor, drama, and celebrity cameos to break down complex financial instruments. It's a must-watch for anyone looking to understand the intricacies of the 2008 mortgage crisis and the systemic corruption that led to a global economic meltdown. Michael Burry is portrayed in a primary role in the film.

Boiler Room

"Boiler Room" takes us into the darker corners of high pressure sales of penny stocks, where ethics are often compromised for quick profits. The film explores the life of a young college dropout who joins a brokerage firm specializing in "pump and dump" schemes. It's a gritty look at the moral compromises people make when money is on the line.

Margin Call

"Margin Call" is a gripping thriller that unfolds over 24 hours at an investment bank on the brink of collapse in 2008 due to derivative exposure. The film does an excellent job of capturing the high-pressure environment of Wall Street investment banking while examining the ethical dilemmas faced by those who navigate its treacherous waters.

Moneyball

"Moneyball" is a different kind of business movie. It shows how analytics and data can revolutionize an industry—in this case, baseball. Based on a true story, the film follows Oakland A's general manager, Billy Beane, who uses statistical analysis to build a competitive team on a tight budget. It's a lesson in innovation and thinking outside the box. It's a lesson on paying for value and optimizing output. Finding players underpriced in the marketplace.

Wolf Of Wall Street

“Wolf of Wall Street” is a roller-coaster ride through the life of Jordan Belfort, a stockbroker who founds his own brokerage firm and engages in corrupt activities on Wall Street. Directed by Martin Scorsese, the film is both a critique and a caricature of the excesses that characterized the under belly of the financial industry, particularly in the 1980s and 1990s.

Inside Job

“Inside Job” is a critically acclaimed documentary that comprehensively analyzes the 2008 financial crisis. Narrated by Matt Damon, the film delves into the systemic corruption and regulatory failures that led to the crisis. It’s a sobering look at the flaws in the financial system and the need for reform.

Trading Places

“Trading Places” offers a comedic take on the world of finance. The film revolves around a social experiment that swaps the lives of a wealthy broker and a homeless street hustler. While it’s a comedy at heart, the movie also provides valuable insights into the social constructs that often dictate financial success. It is said to have been inspired by Richard Dennis’ Turtle Traders experiment.

Enron: The Smartest Guys In The Room

This documentary takes a deep dive into one of the biggest corporate scandals in American history. “Enron: The Smartest Guys in the Room” exposes the corruption and unethical practices that led to the downfall of the Enron Corporation. It serves as a stark reminder of the devastating impact of corporate greed.

Glengarry Glen Ross

Based on David Mamet’s Pulitzer Prize-winning play, “Glengarry Glen Ross” it focuses on the cutthroat world of real estate sales. The film is a character study in desperation and moral ambiguity, as salesmen go to any lengths to close deals. It’s a brutal yet realistic portrayal of the pressures sales professionals face.

Key Takeaways

- Ethical Quandaries: Films like “Wall Street” and “Boiler Room” serve as moral compasses, warning against the perils of greed and unethical conduct.
- Financial Literacy: Movies such as “The Big Short” and “Inside Job” demystify complex financial crises, making them accessible and understandable to the average viewer.
- Innovative Strategies: “Moneyball” exemplifies how unconventional methods and data analytics can disrupt traditional business models.
- High-Stakes Decisions: “Margin Call” and “Glengarry Glen Ross” spotlight the intense pressure and ethical dilemmas professionals face in high-stakes environments.
- Systemic Flaws: “Enron: The Smartest Guys in the Room” and “Inside Job” expose financial systems’ structural weaknesses and corruption.
- Social Dynamics: “Trading Places” humorously yet insightfully explores how societal roles and expectations can influence financial outcomes.

Conclusion

The cinematic world offers a rich tapestry of financial and business narratives that captivate and enlighten. These films serve as cautionary tales and educational tools, illuminating the economic landscape’s complexities, ethical challenges, and innovative possibilities. Whether you’re an industry veteran or a curious onlooker, these movies offer invaluable perspectives that can deepen your understanding of the intricate world of finance and business.

There you have it—the top 10 best finance and business movies offering entertainment and education. Whether you’re in finance or Corporate America, or just interested in it, these films provide valuable lessons and insights that can enrich your understanding of the financial world.

EDITOR'S WATCHLIST

NOVEMBER PRESENTATION

LATEST INTERVIEW WITH CEO DAVID AUSTIN

INVESTOR PRESENTATION

Fury Gold Mines (FURY TSX) closed at .48 on Monday.

On November 6th they announced Intercepts up to 279 g/t Gold over 1.5m at Percival Main [News Release]

Today they announced: Infill Drilling at Fury's Hinge Target Continues to Intercept Multiple Zones of Gold Mineralization (including including 5.5 metres (m) of 4.52g/t gold and 3.0m of 3.34g/t gold) [News Release]

Durango Resources (DGO TSX-V) announced that they have Intersected 93m of Pegmatite At NMX East Lithium Property [News Release]

It was a very small drill program, so we will see what the results are. The company needs money so I'm looking for that financing news. Maybe the lithium angle can help the stock price? Hard to imagine it will unless the assays come in with surprising grades.

Colonial Coal (CAD TSX-V) closed at \$1.87 (TSX-V) on Monday. The stock is up .33 since I wrote about in at the end of October.

The stock took off on the news that Teck sold their steel making coal business to Glencore at an implied enterprise value of US\$9.0 billion on a 100% basis... [The News]

Our platinum subscribers got Peter Epstein's [updated Colonial Coal report] when it came out on November 13th. He had great timing as the Teck announcement came out the following day and Colonial took off.

The November 14th short report shows 157,946 shares short. Of all the stocks you could short, why would you short a stock that could be halted at any time? Crazy times....

Hopefully \$1.75 now becomes support and we can see an uptrend continuing to \$2.25+. The stock price really doesn't matter at this point. This is an asset sale and if it sells for \$2US/t in the ground, we will be at almost \$10 a share. Will it happen and when?

Warren Irwin of Rosseau Asset Management (owns 26M shares) "At present, buyers are clamoring for mines in production like Teck's, but those will soon be gone. The next logical step is high-quality projects like the two owned by Colonial Coal. The world is figuring out how rare high-quality coking coal projects outside of China, Mongolia, Africa & Russia are. It's not often one's able to buy coking coal for US\$0.30/t in the ground when the end product sells for US\$300/t."

The Editor: Editor@MarketTrendNews.com

Market Trend News has been featuring small cap companies for 29 years. The newsletter started out as a print publication and is now distributed over the web.

We feature micro cap and small cap companies that want to spread the word about their company and potential.

Our featured companies come from a wide variety of sectors such as mining, oil and gas, technology, biotech and cannabis.

The Corporate Sponsors pages (featured companies) are companies who have paid for a social media advertising package with Market Trend News Inc. Market Trend News Inc may have a stock position in the company being featured.

The Editor's Watchlist section contains featured companies that the Editor has positions in or is thinking of buying positions in. Consider it a swing trader's blog and in no way a recommendation to buy or sell securities. He is not an advisor. Please do your own research and consult a licensed advisor before taking action.

You are responsible for your trades.

Subscribe

Market Trend News Subscription

Thanks to our corporate sponsors, we are able to cover our costs and offer our newsletter as a free subscription to the reader.

Platinum Subscription

There are two levels of subscriptions. If you are seeing the Platinum logo in the top left hand corner of the first page, then you are Platinum Subscribed. The benefits are that you get the newsletter first. We are also working on other supplementary content that will be offered to Platinum Subscribers first and maybe exclusively.

If you are NOT Platinum subscribed, you can upgrade by clicking on the Subscribe link above or you can remain on the regular list.

Unsubscribing

We do not want to send to people who are not interested. Please use the single click removal link at the bottom of the email that was sent to you. You will be instantly removed.

Links

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Glossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policy making body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.

YOLO

You Only Live Once
