October 26th:

Declares November 2022 Monthly Dividend Payment

Gold has a heart beat!

The Bank of Canada surprised us on October 25th by only raising the interest rate .5% instead of the expected .75%.

The U.S. Fed went the expected .75% but Jerome Powell's speech left the markets in disarray. I don't know if many traders have any idea on when the Fed will pivot to slower hikes. I don't think the Fed has a clue either. The US dollar has weakened a couple cents to the Euro since Powell's speech. Last Friday's U.S. non-farm payrolls report came in higher than expected at 261K.

Gold has bounced off the \$1615ish level three times now and is now testing the \$1678US/oz resistance level again. I think it may take some time to get over that level and establish it as support again.

Have a good week!

CORPORATE SPONSOR

ARGENTINA LITHIUM & ENERGY

Argentina Lithium & Energy believes that the combination of high geologic potential and a promising demand climate have set the conditions for delineating and advancing new lithium resources in Argentina. The Company's management group has a long history of success in the resource sector of Argentina and a strong track record of government and community relations.

Four under-explored projects in the heart of the Lithium Triangle in Argentina.

Brine mapping and drilling planned for 2022.

- ~57,000 hectares of claims on four salars in the Lithium Triangle.
- Projects strategically located in pro-mining provinces Salta and Catamarca, near key infrastructure with year-round access.
- Aggressive new exploration programs in 2022 and continued evaluation of new prospects.

Projects

Rincon West

- 2,491 ha under option; 460.5 ha 100%-held
- Adjacent to Rincon Ltd. and Argosy Minerals lithium projects with proven reserves
- Excellent infrastructure including international highway, electric power corridor
- First drill program, 5 holes, underway
- 1st hole results positive: intersected a 70m permeable interval with 225 to 380mg/L Lithium

Pocitos

- +26,000 hectares under option
- Excellent infrastructure: International railway to Pacific ports crosses the property; Provincial highway and major gas pipeline nearby
- Limited historic exploration

Antofalla North

- 9,080 hectares of 100% held claims + nearly 6,000 hectares under option
- Major lithium producer Albemarle has large holdings starting 500m to the south
- Geophysical survey identified high-conductivity targets in upper 100 metres, additional targets at depth

Incahuasi

- 100% interest in over 25,000 hectares
- Located north of Lake Resources' Kachi Project
- Maximum values 409 mg/L lithium and 1.56% potassium recovered in near-surface sampling (to 8m depth)
- 4 drill-holes confirmed lithium-bearing brines (average to date 109 mg/L Li, 6718 mg/L K)

Exploring the Prolific Lithium Triangle

- Lithium Triangle produces ~1/2 of the world's lithium
- Hosts ~60% of known lithium reserves
- Most lithium is in salt lake ("salar") brines
- Argentina produces ~10% of the world's lithium and is a top-5 global producer (2020)
- In close proximity to rail, water, roads and power
- Argentine government is encouraging foreign investment and renewable energy initiatives

About Dynacor

- An environmentally and socially responsible industrial gold ore processor
- Committed to shareholder returns through monthly dividend stream and stock buyback program
- An alternative gold company investment with a proven and profitable business model
- Engaged in precious metal sales through the processing of ore purchased from the ASM (artisanal small-scale mining) industry
- Environmentally and socially responsible gold sales through PX IMPACT® gold program
- Fine luxury watchmakers pay premiums for certified clean PX IMPACT® gold
- Decades of experience servicing the ASM industry

NEW AUGUST 2022
13 PAGE PRESENTATION

3 YEAR PERFORMANCE REVIEW

DNG NEWS RELEASES

Our featured company is a dividend-paying industrial gold ore processor headquartered in Montreal, Canada. The corporation is engaged in gold production through the processing of ore purchased from the ASM (artisanal and small-scale mining) industry. At present, Dynacor operates in Peru, where its management and processing teams have decades of experience working with ASM miners. It also owns a gold exploration property (Tumipampa) in the Apurimac department.

Q1-2022 Highlights

Operational

- Higher volume processed. 36,696 tonnes of ore (408 tpd average) compared to 29,327 tonnes in Q1-2021 (326 tpd), a 25.1% increase;
- Higher gold production. In Q1-2022, gold equivalent production amounted to 27,691 AuEq ounces compared to 21,975 AuEq ounces in Q1-2021, a 26.0% increase.

Financial

- Solid cash position. \$25.7 million;
- Earnings per share. \$5.1 million (\$0.13 or C\$0.16 per share);
- Sales. \$50.1 million.

Cash Return to Shareholders

- Share buy-back. 285,836 common shares repurchased for \$0.7 million (C\$ 0.9 million);
- Increased dividends. A 25% monthly dividend increase is paid since January 2022. On an annual basis, the 2022 dividend will represent CA\$0.10 per share or more than 3% dividend yield based on the beginning of 2022 share price.

Peru's largest ASM ore purchaser and processor

Aims to become the world's leading processor of ASM ore

15+ years of experience servicing the ASM industry

Strategic partnership with Swiss based refiner, PX Precinox | PX GROUP

*Strong balance sheet with no debt and US\$25.7 million in cash reserves (as of Q1-2022 report)

Non-dilutive business model with only 38.6 million shares outstanding (last equity financing in 2010)

TEN PRINCIPLES FOR TRADING CONSISTENCY (TRADING PSYCHOLOGY)

BY: STEVE BURNS
OCTOBER 11TH, 2022

NEWTRADERU.COM

You can't master the markets as no one knows the future or can predict what millions of traders and investors will do today or tomorrow. The best we can do is master our own behavior in disciplined execution of our own system.

The majority of new traders look to find consistency making money from one strategy, this is impossible as the market is always changing. What should not change is the principles of your trading system that gives you an edge over the long term. Consistency can only be found in your actions and behaviors not in the markets.

Mindset of a trader

The mindset of a trader must be one that accepts uncertainty, trades within their own framework of profitable principles, but can accept losing money. Traders are entrepreneurs accepting risk for the potential of rewards. Traders can accept they don't know what will happen next but can manage the risk while they seek rewards.

Emotional trading mistakes

The biggest mistakes most traders make are ones due to overwhelming emotions. They hold a losing trade because they don't want to take the loss as it proves they are wrong and it hurts their ego.

New traders let losing trades run hoping for a reversal, but cut winners short in fear of giving back small gains. This is the opposite of what they should be doing, this creates a negative risk/reward ratio.

Fear, hope, and greed are expensive emotions to act on in the markets. They can be managed and worked around.

Trading psychology rules

1. Know your edge

If you know what your edge is in the markets then you will stay within your circle of competence in executing it. An edge is simply an advantage you have over other traders for creating bigger wins than losses on average. Knowing your edge can keep you away from random trades and gambling, creating more consistency in execution of your system.

2. Know your expectancy

If you know your profit factor and win rate for your trading system you are more likely to stick with it during losing streaks as you know the losses are temporary. Not knowing their system expectancy causes new traders to abandon a new system too quickly and go back to taking random trades as they feel their strategy doesn't work.

3. Make execution your focus not results

Focusing on what you can control can lead to more disciplined and consistent actions in trading. You can control entries, exits, and position sizing. You can't control

price action and volatility. Focus on the playing field not the scoreboard. If you have a system with an edge the results will take of itself over time.

4. Follow a trading plan

A trading plan documents your trade management from entry to exit before any money is risked. A trading plan can bring consistency to actions as it's written when no emotions or ego are activated. It's a map for a trading journey that sets the guidelines and can keep you safe from bad behavior and random actions through quantification of steps.

5. Use consistent position sizing parameters

The size of your trades should be consistent based on the parameters of your system. Most trades should be the same size with some changes made based on volatility of a chart or market. The variance in risk taken should be consistent and not vary much from trade to trade. Emotions and the ego should never influence your trade size, only math is a good risk manager.

6. Use signals not opinions or predictions

Signals triggered by the market create more consistent results than beliefs about what will happen next. Signals are objective while beliefs are subjective. External guides are more reliable than internal guides when it comes to trading.

7. Focus on what is happening not what you think should be happening

Stay open-minded to what is currently happening in the markets so you keep the consistency of disciplined action. Stay ready to exit from a loss or enter on a new signal. Stay flexible in your actions and disciplined with your execution of signals.

8. Know your minimum risk/reward ratio

Stay consistent with your risk to reward ratio from entry to exit. If you enter with a 1:3 risk to reward ratio when that profit target is reached consider locking in profits. Risk/reward ratios are always changing as a trade moves against you are in your favor, manage accordingly. Don't let a risk/reward profile move against you, keep risks that are still worth the rewards.

9. Know when you are wrong

Have a stop loss level for every trade so you know where the trade is wrong. Keep losing trades consistent in the magnitude of losses. Don't allow trades to move too far against you and create huge losses. The number one reason most traders are unprofitable is due to allowing huge losses.

Keep losses consistently small through a combination of proper position sizing and stop losses. A trader should never lose more than 1% to 2% of their total trading capital on any one trade if they are serious about achieving long term success.

If a trader has a \$100,000 account, they should position size and set stop losses to limit losses to no more than \$1,000 for a single trade. A stop loss level should be at the price level that would signal a trade is wrong, and work back to position sizing.

If a trader with the above account size (\$100,000) enters a stock long at \$105 and the logical technical support on the chart at \$100 then their risk is \$5 a share. A \$1,000 risk is 200 times \$5. So the trader could buy 200 shares of the stock for a total position size of \$21,000. This is a 21% position size and the 1% risk on the total trading capital with a stop loss at \$100 a share. This is how to manage losses to keep them consistently small.

10. Understand your discipline determines your trading destiny

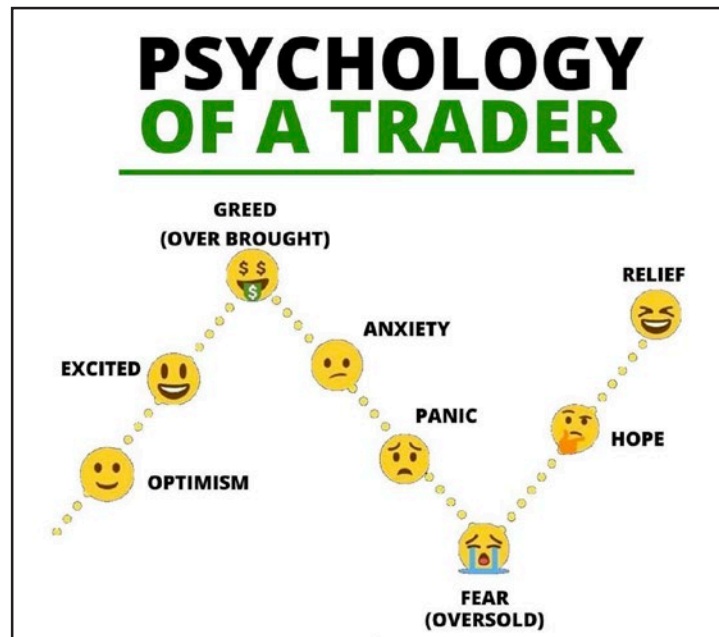

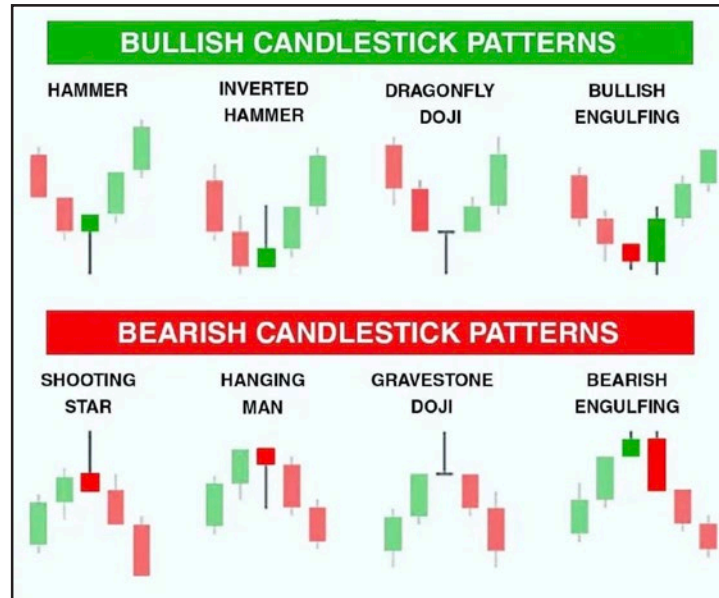

Your ability to stay disciplined and consistent in your actions determines your trading success as much as any other factor. Combining the right trading psychology with a trading system with an edge and then using proper risk management can make you a consistently profitable trader.

Trading Tips - Ashford Trader @StratDevilDog

Would you rather know **a hundred** concepts and strategies, but **fail to execute** any of them
OR
one strategy, **one** pair, **one** setup that you **execute flawlessly**?

Pick wisely. **Less is more...**

Colonial
Coal
International
Corp.

Colonial Coal (CAD TSX-V) had quite the week last week. On Monday the stock closed up .24 and on Tuesday up another .21 to close at \$1.86 with a day high of \$1.98! I'm not sure what was happening but there was some aggressive buying.

Then the roller coaster swung the other way.... Here is the week:

Date	Ex	Sym	Open	High	Low	Close	Chg	Total Vol
2022-11-04	V	CAD	1.46	1.55	1.42	1.48	0.11	53,902
2022-11-03	V	CAD	1.58	1.58	1.36	1.37	-0.11	317,780
2022-11-02	V	CAD	1.84	1.87	1.48	1.48	-0.33	287,039
2022-11-01	V	CAD	1.79	1.98	1.51	1.86	0.21	188,098
2022-10-31	V	CAD	1.40	1.66	1.40	1.65	0.24	114,482

The short position is now showing 70,503. Why would you short something that could be halted and possibly open dollars higher? They must have very high risk tolerance or the shares to cover if it happens.

If you haven't viewed the last webinar: [[Colonial Coal Webinar with CEO David Austin](#)]

Peter Epstein's revised article: [[10 reasons to buy a steel-making \(coking coal\) company, and why it should be Colonial Coal](#)]

Benz Mining (BZ TSX-V) had exciting news on October 27th, 12 new pegmatite zones identified at Ruby Hill West. Pegmatite could mean Lithium. I can't wait for them to start drilling in January.

Highlights:

- **12 new pegmatite rich areas** associated with greenstone/granite boundaries identified and 45 rock chips samples collected during recent field campaigns
- **129 additional claims acquired** expanding the existing tenement package, adding 20km of additional granite/greenstone contact strike for a total of 90km of contact
- Pegmatites at Ruby Hill West Lithium discovery announced earlier this year with **26.4m at 1.01% Li₂O** intersected in maiden drill program
- 3,822 samples from 2022 exploration programs currently pending assays including half core samples from historical hole RHW-08-003 where **~80m of pegmatite was historically intersected but not assayed**
- Winter drilling to start in January 2023 targeting both critical minerals and gold
- **Exploration fully funded for next 15 months with C\$10m program**

Market Trend News has been featuring small cap companies for 29 years. The newsletter started out as a print publication and is now distributed over the web.

We feature micro cap and small cap companies that want to spread the word about their company and potential.

Our featured companies come from a wide variety of sectors such as mining, oil and gas, technology, biotech and cannabis.

The Corporate Sponsors pages (featured companies) are companies who have paid for a social media advertising package with Market Trend News Inc. Market Trend News Inc may have a stock position in the company being featured.

The Editor's Watchlist section contains featured companies that the Editor has positions in or is thinking of buying positions in. Consider it a swing trader's blog and in no way a recommendation to buy or sell securities. He is not an advisor. Please do your own research and consult a licensed advisor before taking action.

You are responsible for your trades.

Subscribe

Market Trend News Subscription

Thanks to our corporate sponsors, we are able to cover our costs and offer our newsletter as a free subscription to the reader.

Platinum Subscription

There are two levels of subscriptions. If you are seeing the Platinum logo in the top left hand corner of the first page, then you are Platinum Subscribed. The benefits are that you get the newsletter first. We are also working on other supplementary content that will be offered to Platinum Subscribers first and maybe exclusively.

If you are NOT Platinum subscribed, you can upgrade by clicking on the Subscribe link above or you can remain on the regular list.

Unsubscribing

We do not want to send to people who are not interested. Please use the single click removal link at the bottom of the email that was sent to you. You will be instantly removed.

Links

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Glossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policy making body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.

YOLO

You Only Live Once
