Black Gold Continues to Rise

Oil has been on the uptrend for over a year. It bottomed out on April 20th, 2020 with a low on my platform of \$6.48US/barrel. Many sources had WTI futures contracts trading at negative prices on April 20th. [[Forbes Article](#)]

Oil has broken out of its downward channel and looks good so far. The chart shows some resistance in the \$75 range and then at \$90ish.

Run away assets tend to run further than people expect and then the correction comes. Oil hasn't seen a big correction in over a year. Look at the past swings, \$107 down to \$26, then up to \$76, then down to basically \$0, now we are up to \$71 again.

Is it time? Watch that \$75-\$76 level!

March 2021: New 18 page power point presentation.

[View the Presentation](#)

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in an open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would be expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property. The resource estimate update is currently expected in Q1 of 2021.

In 2020, The Quebec Government released the Quebec Plan for Development of Critical and Strategic Minerals ("The Quebec Plan") which indicates graphite demand would likely increase 300-500% in the coming decades as more is used in the production of spherical graphite for anode portion of Electric Vehicle Lithium-ion batteries.

About Dynacor

- An industrial gold ore processor
- Committed to shareholder returns through monthly dividend stream and stock buyback program
- Engaged in metal sales through the processing of ore purchased from the ASM (artisanal small-scale mining) industry
- Environmentally and socially responsible gold sales through PX IMPACT® gold program
- Fine luxury watchmakers pay premiums for certified clean PX IMPACT® gold
- Decades of experience servicing the ASM industry
- Potential to create value through the drill bit at 100% owned Tumipampa gold project
- *US\$16.6 million (C\$22.1 million) in cash and debt-free

Our featured company is focused on gold ore processing in Peru. They have been pouring gold in Peru since 1998.

Dynacor's 300 tonnes per day plant opened in 2016. The plant was designed for up to 600 tonnes per day expansion. On March 24th, 2021 the company announced that they would spend \$1.8Million to upgrade its ore processing capacity to 430 tonnes per day, a 43% increase. The construction completion date is scheduled for June 2021. The processing plant is located 5km off the main Pan American Highway in the hub of ASM high-grade operations (South Peru).

Dynacor's PX IMPACT® Clean Gold Program

- Environmental, social and ethical practices that respect human rights are an integral part of the PX IMPACT® clean gold program
- An investment premium is paid by PX Precinox customers on the PX IMPACT® clean gold program
- A lasting & positive contribution to the economic, social and environmental development of our mining communities
- Guarantees complete traceability across the gold ore supply chain coming from government registered miners
- 100% of the premium paid is invested into the ASM mining communities

[View the Fact Sheet](#)

Dynacor Business Cycle:

1. Purchase high-grade ore at a discount to the spot price of gold from ASM client list consisting of over 500 mining groups
2. Weigh, assay & screen ore for gold content at our Veta Dorada plant
3. Ready for payment to ASMs within 72 hours from reception of ore
4. 5-8 days in processing the ASM ore to a gold dore bar level 99.5% pure
5. Receive payment at gold spot price from our strategic partner, PX Precinox in Switzerland

Dynacor's 2021 financial forecast has the company having total sales of \$150M U.S. with an Earnings per Share of US\$0.18 (.23CAD) based on an average gold price of \$1850US/oz. The price of gold directly influences Dynacor's bottom line.

Dynacor is also looking at expanding into processing gold ore in Senegal and they are planning to drill their Tumipampa property in South Central Peru.

Our featured company is engaged in junior mining exploration (gold and silver) in Nevada and Arizona. The company was founded in November 2016, has a tight share structure and insiders have been participate in every financing.

The Philadelphia Property Drill Program is Now Underway

Philadelphia Slide Show

- Drill holes also contain high levels of Beryllium
- Past production indicates gold grades ranged from 10 - 27g/t Gold
- Historic silver grades in production shaft average 420 g/t Silver
- Readily accessible - less than 100 metres from paved road access
- 1.5 km of strike untested to the north and approximately 2 km of strike untested to the south

Presentation

Fact Sheet

GMN Report 3-31-2021

Property Highlights:

The Philadelphia Property

- 100% owned - High-grade historic producer
- No NSR, Bought out lease agreement
- 5 km of strike untested to date
- 33.56 gpt Au & 54.7 gpt Ag over 2.35m
- 10.76 metres containing 9.26 gpt Au , 79.8 gpt Ag, & 344 gpt Be
- 41.6 gpt Au & 94.4 gpt Ag over 0.76 m.
- 23.47 gpt Au & 97.2 gpt Ag over 2.3 m.

Silverton Gold-Silver Project

- Carlin Type Deposit
- 100% owned - 1540 acres
- Past drill results contain 1 to 16 grams gold

The Ramsey Silver Project

- 100 % owned
- 18 for 18 on drill results on "Ramsey Mine target"
- High-grade historic silver producer
- Silver mineralization is open-pittable at depths intersected to date
- All holes have hit thick zone of "disseminated silver"

Sycamore Canyon Gold-Silver Project

- 100 % owned
- 31 gpt Gold & 553 gpt Silver at surface
- 800 Meters long & 110 meters wide to date
- Maiden drill program planning in process

Benz Mining Presentation

Eastmain Project - Video

Larder Project

Corporate Presentation

Technical Presentation

The Northern Miner Article

Benz (BZ TSX Venture), traded as high as 97 cents on May 31st and has traded 1.3 Million shares since our last newsletter. It closed Friday at 80 cents. Everyone is waiting for drill results to come out. It seems to be the same story for many juniors, hurry up and wait! I sure hope the labs start picking up the pace with Covid numbers in Canada coming down. Benz is in the middle of a 50,000m fully funded drill program for 2021.

Benz has two drill rigs going, many holes have been completed in 2021, and many samples that have been shipped to Australia to be analysed by PhotonAssay. April 23rd News: "This assay method is non-destructive and is better suited to systems where gold is nuggetty (in coarse gold particles). There are multiple occurrences of coarse gold at Eastmain. This innovative analytical methodology is an environmentally friendly replacement for fire assay and allows for a more accurate measurement of gold grades where coarse gold is present."

May 26th News: "The Eastmain Gold Project, situated on the Upper Eastmain Greenstone Belt in Quebec, Canada, currently hosts a NI 43-101 and JORC (2012) compliant resource of 376,000oz at 7.9gpt gold (Indicated: 236,500oz at 8.2g/t gold, Inferred: 139,300oz at 7.5g/t gold). The existing gold mineralization is associated with 15-20% semi-massive to massive pyrrhotite, pyrite and chalcopyrite in highly deformed and altered rocks making it amenable to detection using electromagnetic techniques. Multiple gold occurrences have been identified by previous explorers over a 10km long zone along strike from the Eastmain Mine with very limited but highly encouraging testing outside the existing resource area."

I think/hope we should see some results soon.

Gatling (GTR TSX Venture) is trading at 52 week lows. On Friday Gatling announced a \$3 Million private placement which consists of 4.4M Flow Through shares at 45 cents and 2.5M regular shares at 40 cents. There will be a 1/2 warrant attached at 60 cents.

A bit puzzling that the financing was done so low but sometimes there is a method to the madness. Often there is pressure in the market when institutions know a financing is coming. They are hoping to get cheaper stock and the warrant attached.

I'm hoping the financing is going into strong hands and large investors that will also help in the market. Time will tell and maybe Gatling will announce who is in the financing when it closes.

Gatling will still have a tight structure and hopefully enough \$\$ to finish their drilling and resource estimate this year.

Gatling's last drill result news release was April 20th (200.7m of 1.5g/t starting from 3.2m depth). We are approaching two months with no drill results, so I would guess some more results are coming soon. Like I said, all these juniors are suffering from slow lab turn around.

Nothing changes what is in the ground, 4.5km of strike with three deposits that are now proven to be connected.

So we have a company with a market cap of roughly \$13 Million, with a historical estimate of 960,000oz of gold.

We have a company that is drilling 25,000m this year with two rigs and core is continuously going to the lab.

We have a company that is going to put out another resource estimate later this year. 140,000m of drilling results will be included in the resource estimate.

There have been drill intercepts of 100m and 200m wide from shallow depths.

In my opinion, at some point, larger companies and institutions will start to pay attention.

1/26/2021: 101.3m of 1.1g/t Au

2/16/2021: 170.0m of 1.5g/t Au

4/7/2021: 114.3m of 0.8g/t Au

4/20/2021: 200.7m of 1.5g/t Au including 23.7m of 6.1 g/t Au
