GOLD WEEKLY CHART

PM Pampa Metals

August 8th: Pampa Metals Confirms Tertiary Age for Host Rock Porphyry and Native Gold-Sulphide Mineralization in Quartz-Veinlet Stockwork at the Buenavista Target (Block 4 Project)

Gold: 3 Positive Weeks

Gold closed at \$1775US/oz on Friday which gives us 3 positive weeks after bouncing off a major support level of \$1680US/oz. Is this a triple or quadruple bottom?

A new U.S. CPI Number (Inflation) comes out on Wednesday. Previous was 9.1% and consensus is that Wednesday's number will be 8.7%.

Tensions between China and the U.S. heated up last week with Nancy Pelosi visiting Taiwan despite warnings from China.

The U.S. is preparing a new \$1 billion security assistance package for Ukraine, which will include munitions for long-range weapons and armoured medical transport vehicles, according to Reuters.

There is no shortage of turmoil in the world, gold should benefit.

Have a great week!

China-Taiwan news - The Guardian:

Taiwan says China used 66 planes and 14 warships in Sunday's drills

3 REASONS FOR THE FERTILIZER AND FOOD SHORTAGE

3 REASONS FOR THE Fertilizer and Food Shortage

Bad weather, the war in Ukraine, and a shortage of fertilizer have led to fears of a global food crisis.

Here are 3 graphs to help understand the problem.

WHICH COUNTRIES PRODUCE THE MOST NATURAL GAS?

THE LARGEST PRODUCERS OF NATURAL GAS

Russia's invasion of Ukraine has exacerbated the tightening supply of natural gas underway since mid-2021, further pushing up prices. Besides having the largest natural gas reserves, Russia is the second biggest producer, only behind the United States.

i Natural gas is a naturally occurring hydrocarbon gas and non-renewable fossil fuel that forms below the Earth's surface. Liquefied natural gas (LNG) is a natural gas that has been cooled to -162°C, a process that is commonly done for gas export purposes as it reduces the volume of the transported gas.

Production in billion cubic meters* (2021)

CORPORATE SPONSOR

Snapshot

Copper: One of the greatest growth profiles and demand / supply metrics

Gold: One of most attractive high-value metals

Chile: Elephant country for major economic copper deposits

People: Highly experienced with execution ability & track record

Projects: Portfolio breadth & depth – along proven mineral belts of Chile

Current focus: 4 projects – with 2 additional projects subject to 3rd-party expenditure via JV

Progress: Rapid progress including 2 drilled projects – further drilling planned for 2022

JV Funding: 2 projects subject to 3rd party expenditures – drilling started in January 2022

INVESTOR SUMMARY

FACT SHEET

NEWS RELEASES

Our featured company owns a highly prospective 62,000-hectare portfolio of eight projects for copper and gold located along proven mineral belts in Chile, one of the world's top mining jurisdictions. The Company has a vision to create value for shareholders and all other stakeholders by making a major copper discovery along the prime mineral belts of Chile, using the best geological and technological methods.

The Projects - Current Priorities

Cerro Buenos Aires (7,600 Ha):

- Located south of Spence / Sierra Gorda district
- Recent drilling through post-mineral cover has vectored towards porphyry target

Redondo-Veronica (6,600 Ha):

- Located north of giant La Escondida district
- Recent drilling gives line of sight to 2 deep porphyry targets

Block 4 (6,800 Ha):

- Located south of giant La Escondida district
- Quartz-vein stockwork – coincident with magnetic high – partial post-mineral cover

Block 3 (10,100 Ha):

- Located south of giant La Escondida district
- Post-mineral cover - adjacent to 2 historically drilled porphyry targets – magnetic anomalies

Arrieros (13,700 Ha):

- Large, post-mineral covered property situated between Chuquicamata and Centinela districts
- Magnetic and IP anomalies

Block 2 (3,300 Ha):

- Structural target – pending exploration advances

Projects subject to 3rd Party Expenditures (Austral Gold Ltd)

Morros Blancos (7,300 Ha):

- HS systems – maar-diatremes – vuggy silica
- Drilling started (January 2022)

Cerro Blanco (6,500 Ha):

- Small lithocap outcrop coincident with magnetic high. Extensive post-mineral cover

FURY CEO INTERVIEW

AUGUST 1ST NEWS

AUGUST 2ND NEWS

Fury Gold Mines (FURY TSX-V) closed at .57 on Friday. Last Wednesday they announced drill results from the hinge target at the Eau Claire project.

From the news:

Drill holes 22EC-046, 22EC-047 and 22EC-048 targeted a 150 to 200 metre (m) extension of the intercept of 3.0m of 9.36 g/t gold from drill hole 21EC-041 (see news release dated November 29, 2021). All three drill holes intercepted multiple zones of gold mineralization, with hole 22EC-048 exhibiting four zones of high grade and broad widths of more moderate grade, **including 3.50m of 4.79 g/t gold, 1.00m of 14.19 g/t gold, 3.50m of 5.86 g/t gold, 1.00m of 20.6 g/t gold and 17.50m of 1.29 g/t Au (Table 1)**. Fury believes these intercepts represent the apex of the targeted fold hinge and reflects the deposit geometry that the technical team believes could deliver significant resource growth. The Hinge Zone drilling to date demonstrates a potential 20%, or 330m, increase to the mineralized strike length of the Eau Claire Deposit with results pending from additional drill holes located 100 metres further west of the reported intercepts.

“The recent holes represent Fury’s best exploration drilling result to date at Eau Claire and are exactly what we were hoping to see at the Hinge Target. The drill results confirm our belief that the Hinge is open for considerable growth which could impact our ounces significantly,” commented Tim Clark, CEO of Fury. “We are halfway through our 2022 drilling program and are very excited about the pending assay results still to come. In the following weeks and months, Fury will have a steady news flow with additional drill results from the Hinge, North Limb, and Percival Prospect. The Company is well positioned with our exploration strategy, our team in the field, and our ability to continue to leverage a strong treasury.”

Benz Mining (BZ TSX-V) closed at .38 on Friday. Since our last newsletter Benz Mining has put out drill results from their Ruby Hill West Lithium discovery.

Highlights from the news:

High grade intercept from near surface in last drillhole of the April 2022 campaign Assays for RHW22-006 returned:

26.4m at 1.01% Li₂O, 355ppm Ta₂O₅, 980ppm Cs, 1601ppm Rb₂O from 7.4m; including 12.7m at 1.29% Li₂O, 423ppm Ta₂O₅, 1160ppm Rb₂O, 600ppm Cs; and 3.7m at 2.61% Li₂O, 579ppm Ta₂O₅, 1061ppm Rb₂O, 441ppm Cs

Very high-grade (+2.5% Li₂O) with tantalum, rubidium and caesium association RHW22-001, 002, 003 and 005 show lithium caesium tantalum (LCT) signatures confirming the presence of multiple dyke systems in the area

Hole RHW22-006 was collared directly into weathered pegmatite

Multiple newly identified outcrops surround the RHW22-006 collar

RHW22-006 potentially not collared optimally to fully test the pegmatite intrusion

Historical 2008 core discovered at the Eastmain site shows unsampled pegmatite intervals mistakenly referenced as granite up to 80m thick

Have a look at the news release, lots of information on the drill hole locations and pictures of the cores and fieldwork.

Durango Resources (DGO TSX-V) closed at .08 on Friday. On August 2nd they announced a grab sample taken by (chip, channel, saw), a 4.3kg rock sample was sent for assay and returned 13.5 g/t gold. I think you have to wonder why they did this? I’ve been investing in the markets for 20+ years and it isn’t what exploration companies usually do. The company is currently processing the recently completed six drill holes.

I watch the daily trading and it is being looked after in my opinion. It usually trades first thing in the am and then offers are bought near the close. Volume is picking up and the stock is being accumulated. Will we see a push back to .12-.15? I think drill results will take some time and the company will need to finance again to do more drilling.

Is the Lithium/Pegmatite surface sampling from the April 12th news coming soon?

Market Trend News Subscription

Thanks to our corporate sponsors, we are able to cover our costs and offer our newsletter as a free subscription to the reader.

Platinum Subscription

There are two levels of subscriptions. If you are seeing the Platinum logo in the top left hand corner of the first page, then you are Platinum Subscribed. The benefits are that you get the newsletter first. We are also working on other supplementary content that will be offered to Platinum Subscribers first and maybe exclusively.

If you are NOT Platinum subscribed, you can upgrade by clicking on the Subscribe link above or you can remain on the regular list.

Unsubscribing

We do not want to send to people who are not interested. Please use the single click removal link at the bottom of the email that was sent to you. You will be instantly removed.

L inks

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

G lossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policy making body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
