Where is Gold going??

Gold has gone straight down since our last newsletter. From \$1830US/oz down to the \$1750US/oz level.

I've laid out the significant support and resistance levels in the chart above and it is looking like another test of the \$1678 level might be coming.

Since our last newsletter the Dow Jones 30 dropped about 2,000 points in 10 days. It seems to be rebounding over the last 4 days but events like the Evergrande crisis could continue to cause market instability. Go to the next page and click on the Bloomberg Special video which covers the Evergrande story.

I'd like to welcome all our new subscribers and I hope everyone has a great week!

Investment Highlights

- Proven Management with decades of experience in the Guiana Shield
- Tassawini Gold Project hosts an Historical Resource of 499,000 oz. (SRK, 2010) Non 43-101
- \$34M spent previously with mineralization open in several directions
- Licensed for mining
- Large influx of capital into the region for exploration and production
- Building a Guyana focused producer with exploration upside

Our featured company is a gold explorer and is currently in the process of acquiring the Tassawini Gold Project in Guyana.

The Tassawini Project

- 1381 hectares
- 120 person camp
- 650m commercial airstrip
- Tidal river capacity for 1,000 tonne barges
- ~100km to Atlantic Ocean

Deposit

- Medium Scale mining permits issued in 2018; renewable in 5 year cycles.
- Extensive historic Diamond and RC drilling since 2004:
 - 47,509 meters in 1,279 holes
- Metallurgical testing 73-97% , mostly in saprolite.
- Additional Regulatory Approvals: Only completion of EIS necessary for production.
- Full government backing. Historical Amerindian claims defeated in two court rulings in 2013 and 2017.
- Local government support includes setup of a local police station to protect land

Historical Resources (non 43-101)

- Indicated: 437K oz Gold
- Inferred: 62K oz Gold

Upside potential with structural, geological, geochemical and geophysical targets

Potential for MultiMillion Ounce Gold Endowment

The Harpy Property

- Project located in the prolific Guiana Shield of South America which contains over 110 MM oz Au inventory
- Adjacent to Guyana Goldfields producing over 220,000oz per year. Recently purchased by Zijin Mining for \$323 Million.
- Located on the Cuyuni River for ease of access, barging personnel, exploration and drilling equipment.
- Significant artisanal mining throughout the Company's property, identifying early exploration programs.
- 100% owned by Harpy with all exploration and environmental permits in hand.

The Aura Project

Project One's wholly owned Aura Property, is made up of 2,706 hectares of contiguous claims and is located approximately 150 kilometers east of Vancouver, British Columbia. It is close to two recently operated mines and several high profile exploration properties.

Noranda's historic work returned fifty-one (51) continuous 1.5 metre chip samples collected along the trend of the anomalous outcrop of quartz breccia that returned consistently anomalous levels of gold. The average over 76 metres was 514 ppb (or 0.514 g/t) gold, including a 13.5 metre section of 1034 ppb (or 1.034 g/t) gold.

HIGH GRADE FLAKE GRAPHITE

A CRITICAL MATERIAL FOR THE
GREEN ENERGY REVOLUTION

The New Green Economy

The world is waking up to the reality that the way we consume fossil fuels for energy is having an adverse impact on our planet. Alternative and clean forms of energy generation and storage are being developed at a rapid rate, and the movement includes the electrification of consumer cars and other vehicles that have up until now been fueled by gasoline.

Fundamental Research Corp.
Lomiko Research Report

BUY

Current Price: C\$0.14

Fair Value: C\$0.31

Risk: 5

Our featured company is a junior mining company that is based in Canada and is publicly listed on the TSX Venture Exchange under the symbol LMR.

Founded in 2009, Lomiko is focused on the exploration and development of minerals for the new green economy, such as lithium and graphite. Lomiko also has a 100% interest in Lomiko Technologies Inc., an investor in graphene technology and manufacturer of electronic products.

Lomiko aims to become the leading supplier of North American-sourced, high-grade large flake graphite and lithium to the North American electric vehicle and other green technology industries. We believe that renewable, sustainable energy sources will continue to grow in importance and will soon replace traditional carbon-based forms of energy production, and we want to lead the charge when it comes to providing a secure, domestic supply of these critical minerals to power the green energy revolution.

Lomiko is actively developing two main projects in the province of Quebec: La Loutre, which is held 100% by Lomiko and is being explored for high grade large flake graphite, and Bourier, which has

been optioned by Lomiko and is being explored for lithium. Both graphite and lithium are essential to supply North America's rapidly expanding electric battery and green energy industries.

The La Loutre Property consists of one large contiguous block of 42 mineral claims totaling 2,508.97 hectares (25.09 km²) located approximately 117 km northwest of Montréal in southern Québec and 53 km east of the Imerys Graphite and Carbon Lac des Iles mine. In 2021, the company began the process to eventually supply graphite to the US market under a Canada-US agreement covering critical minerals.

[Learn More](#)

The Bourier project consists of 203 claims for a total ground position of 10,252.2 hectares (102.52 km²) in a region of Quebec that boasts other lithium deposits and known lithium mineralization. The Bourier project is potentially a new lithium field in an established lithium district.

Investment Highlights

Expansion resource drilling underway to convert and increase historical resource to NI 43-101 compliant.

C\$2,400,000 raised for drilling in Q2-2021.

Testing untested iron formation nose hinges which could host significantly higher-grade gold intercepts.

Four historic, at surface, proven brownfields gold zone targets remain untested by Rover.

Gold at Cabin is hosted in steeply-dipping folded iron formation. Only the top 100m of the iron formation has been drilled. The iron formation extends for at least 15km in length at surface (greater length if folding taken into consideration).

12 additional greenfields drill targets at the Cabin Gold Project.

2 additional nearby projects with similar geology (Slemon Gold & Camp Gold claims).

Our featured company Rover Metals is a natural resource exploration company specialized in North American precious metal resources. Rover is currently advancing the gold potential of its projects located in the Northwest Territories of Canada at the 60th parallel. Rover has 100% ownership of its core gold assets.

14 million ounces of gold has been historically mined in the region.

The Cabin Gold Project

- 145km Road to city (Yellowknife, NT)
- Hydro (Strutt Lake Hydro, NT Power Corp)
- Four junior gold miners 5-10 years ahead of Rover in the mine building cycle.
- Readily available skilled mining labor in surrounding towns and city.

Iron Formation Hosted Gold

- Three land parcels of gold claims:
 1. Cabin Gold (2021 NEW drilling)
 2. Slemon Gold
 3. Camp Gold
- CAD\$10MM invested into exploration

Comparable Historic Gold Mines

- Lupin Gold Mine, NT, Canada
- Homestake Gold Mine, S. Dakota, USA

ARROW ZONE - HISTORIC & NEW HIGH-GRADE GOLD DRILL INTERCEPTS

Historic 86-28: 11.74g/t Au over 16.0m	New Hole CL-20-01: 7.94g/t Au over 22.01m
Historic 86-28: 11.74g/t Au over 16.0m	New Hole CL-20-08: 13.6g/t Au over 32.0m
Historic 86-12: 15.77g/t Au over 8.02m	New Hole CL-20-01: 7.94g/t Au over 22.01m
Historic 86-12: 15.77g/t Au over 8.02m	New Hole CL-20-08: 13.6g/t Au over 32.0m
Historic 86-10: 8.31g/t Au over 14.7m	New Hole CL-20-03: 6.97g/t Au over 13.7m
Historic 86-11: 6.12g/t Au over 7.1m	New Hole CL-20-03: 6.97g/t Au over 13.7m

Q3-2021 Drilling Underway

Highly Sulfidized (>30% pyrite) Drill Targets

- ~3,000 meter drill program underway
- High-grade gold at the Arrow Zone is associated with >30% sulfidization (pyrite)
- NEW Drill Targets were selected based on pyrite content:
 - o The Beaver Zone historic drilling reported >30% pyrite
-400 meter step-out target from Arrow Zone
-preliminary results showing 90% increase to reported historic grade
 - o The Andrew South Zone historic drilling reported >30% pyrite.
Target is a folding hinge in the iron formation.

July 5th, 2021 Report

Colonial Coal Presentation

Epstein Research Report

COKING COAL DAILY:

Seaborne cfr prices strong despite divergent outlooks

Coking coal prices in the seaborne cfr market were strong on Friday September 24, with views split among market participants over the direction of prices during the upcoming winter season.

Fastmarkets indices

Premium hard coking coal, cfr Jingtang:

\$600.82 per tonne, +\$1.51 per tonne

Hard coking coal, cfr Jingtang:

\$575.23 per tonne, +\$25.23 per tonne

Premium hard coking coal, fob DBCT:

\$405.99 per tonne, -\$5.08 per tonne

Hard coking coal, fob DBCT:

\$334.84 per tonne, -\$2.50 per tonne

Fastmarkets Weekly PCI indices

PCI low-vol, cfr Jingtang: \$273.27 per tonne, +\$0.12 per tonne

PCI low-vol, fob DBCT: \$252.92 per tonne, +\$10.12 per tonne

In the cfr market, seaborne hard coking coal prices increased by more than \$20 per tonne on Friday after a trade was heard done at higher levels.

A cargo of United States-origin second-tier hard coking coal Buchanan was traded late last week at around \$560 per tonne cfr China, Fastmarkets heard on Friday.

Colonial Coal's (CAD TSX-Venture) stock price exploded on September 8th. The stock topped out at \$1.78 on September 9th, which is a double from the start of September. I can understand that technically the stock was due to break previous highs but the amount it popped was a surprise. No news out of the company and the stock was not halted during the rapid price rise. Over the past few days, Colonial's stock has slid all the way back to that \$1 support area and it will be interesting to see if this is where we will see a new bottom built.

Last week David Emri's Sept. 1st Market buy showed up in the filings. According to the filing David added 2.5 million shares to one of his accounts at .86 a share. That account balance is now 13,159,000 shares and he oversees 21.4 million shares.

Late last week Huawei's executive Meng Wanzhou negotiated a deal with the United States and Canada allowed her to fly home. China reciprocated with the release of Michael Kovrig and Michael Spavor who had been held by China since 2018. Why does this matter? Well it possibly opens the door for the Chinese to be bidders for Colonial Coal. China's demand for Met Coal has to be met from somewhere. They are currently not buying from the Australians and the price of Met coal has gone through the roof.

The facts:

- 1) No statement out of Colonial Coal on the huge share price spike & volume ???
(Last IIROC "unaware of any material change" news was June 22, 2020 with 461,000 shares traded that day.)
- 2) Met Coal continues to trade higher
- 3) Institutions/Management own large blocks of shares
(With a recent large purchase of 2.5 Million shares by Emri)
- 4) Colonial Coal has 695Mt of Met Coal, valued at **.25USD/t in ground ???**
- 5) As of April 30, 2021 the company has \$5 million in cash
- 6) Infrastructure spending increases demand for steel and Met Coal
- 7) Management History: David Austin sold Western Coal for CA\$3.3Billion
- 8) Board Member: Partha Battacharyya
(Is a former Chairman and Managing Director of Coal India)

I would suggest having a look at Peter Epstein's research report on Colonial Coal, the Tormont 50 Report, and reviewing the Colonial Coal presentation.

Hindsight is always perfect. I could have dumped all my shares at \$1.50+ and would be in a great position to reaccumulate at these lower levels. What would I be feeling now if I had sold, then two days later it continued to go up, and maybe even got halted because of a bid for the company?

I'll exercise my diamond hands and continue holding for the 10x potential, I think there is DEEP Value here!

L inks

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

G lossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.

YOLO

You Only Live Once
